Before making any investment decision please consider all the risks and costs detailed in the Prospectus and Key Information Document (KID), which are available online by [clicking here](#)

SFDR classification: The Sub-fund promotes environmental or social characteristics as per Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR"). It does not have sustainable investments as its objective.

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Sub-fund consist of excluding sectors which are deemed harmful to society by the Investment Manager, while considering various ESG information, as further described below. In addition, the Investment Manager applies a targeted engagement and voting process to the equity bucket and, to a limited extent, to the fixed income asset classes. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

Binding elements: the following exclusion criteria apply to the Sub-fund: Direct involvement in from controversial weapons (cluster munitions, anti-personnel mines and/or biological/chemical weapons), Violation of the Treaty on the Non-Proliferation of Nuclear Weapons, 10% or more of turnover is derived from pornography, 20% or more of turnover or energy produced is derived from coal or 20% or more of turnover is derived from tobacco. Moreover, the Sub-fund has a targeted approach that involves the selection of companies on which to focus engagement activities and the possibility of influencing decisions in relation to the voting shares held or the share held in the bond issue.

Limitations to methodologies and data: Although various sources are used to ensure that environmental and social characteristics are applied for the Sub-fund, there are limitations to the methodologies and data sources. The data is based on public sources and information bias exists. For example, larger companies are subject to more transparency requirements than smaller companies. In addition, the possibility exists that relevant information for the Sub-fund's investments are not publicly available. Some, but not necessarily all, limitations in performing sustainability and ESG analysis are as follows: • The availability of data, particularly for emerging companies and markets. The consistency and / or comparability of data as not all companies publish the same indicators. • The quality of data and the lack of universal standards related to third party verification, if any. • The use of external providers can introduce bias resulting from the providers' proprietary methodologies.

The Investment Manager will evaluate the data quality and availability and monitor alternative sources for any missing data,

Before making any investment decision, please consider all the objectives, characteristics, binding elements of the selection process and methodological limits contained in the Prospectus, the SFDR Pre-contractual Annex, as well as the Summary of the website Product disclosure available at the following link:
